

The XL was designed from the outset to offer maximum security and reliability.

XL features three hooks, two steel anti lift bolts and the option of either two or four roller cams for compression and smooth operation.

Every XL lock is extendable top and bottom for maximum flexibility and combined with Fullex high security shootbolts, the XL French door system is fully capable of meeting PAS24 requirements.

- Secured by Design
- PAS23/24 tested
- Three opposing steel hooks and two steel anti lift bolts
- Two or four roller cams
- Dual or single spindle options
- Easily reversible latch
- Latch hold back snib on lock faceplate
- One piece or individual keeps
- Extendable top and bottom as standard
